PROJECTS

AI Mentorship – TrackSense

Artificial Intelligence Society

- A 10-week build for a Formula 1 prediction and analytics platform turning raw race data into an interactive workspace; built with 5 other mentees
- Implemented 3 AI-driven features: a simulation engine with live telemetry for past and future races, a custom ELO system, and an AI/ML prediction Model using XGBoost tuned with Optuna
- Focus was on UI/Frontend using Figma wireframes and then building out designs in TailwindCSS and React for a total of 10 pages and over 20 components

Product Division

Nebula Labs

- Nebula Labs designed multiple student-based tools such as a better way to register for classes and find clubs
- Contributed to user research and product feedback for student-facing tools in development and deployment
- Co-moderated a focus group/interviews for 3 platforms under Nebula Labs, gathering qualitative feedback from UTD students to inform product decisions

Time2Invest

WEHack 2026

- Turns financial literacy into an experience where the user is handed a \$10000 portfolio and shown real headlines from past market crashes and decides what they will do with their finances
- Implemented React + Vite for the frontend framework with TailwindCSS for styling along with Subabase(PostgreSQL) for our user database and Alpha Vantage API for real S&P 500 prices
- Created a “frozen-in-time” AI advisor using Groq so the users can get aid in making financial decisions without being given the perfect answers

PROFESSIONAL EXPERIENCE

07/2025 – Present

Game Master

Red Door Escape Room

- Run escape room experiences for guests end-to-end: brief groups before play, monitor live gameplay, deliver hints to each group's pace, and reset rooms between sessions.
- Manage front desk operations including bookings, check-ins, payments, and customer questions. Often handling multiple groups and walk-ins simultaneously during peak hours
- Developed strong real-time judgment from observing how different groups approach problem-solving: adapting communication style and hint timing to keep games engaging for first-timers and experienced players alike.

EDUCATION

08/2024 – Present

Bachelor of Science in Cognitive Science – Artificial Intelligence and Human-Computer Interaction

University of Texas at Dallas

GPA: 3.69 on 4.0 Scale

Data Science certification in progress

(Expected Graduation 05/27)

08/2022 – 12/2025

Associate of Science in General Studies

Collin College

GPA: 3.69 on 4.0 Scale

Dual credit classes in high school and classes during summer in college

08/2020 – 05/2024

High School Diploma

Plano West Senior High School

GPA: 4.1 on 4.5 Scale

CERTIFICATIONS + TECH STACK

Microsoft Office Specialist Word, Excel, PowerPoint, and Access

Passed (Fall 2021-Spring 2022)

Stukent Certified in Social Media Marketing

Passed (Fall 2022)

Python, C++, Javascript, R, MATLAB, Figma, Framer, Adobe Illustrator, Adobe Photoshop, Canva, React, TailwindCSS, Vite, CSS, Webflow, FastAPI, Node.JS, Postgres, Supabase, Anaconda, Jupyter, Arduino
